“Digital marketing bridges the gap between treatment and daily nutrition.”

DIGITAL MARKETING PROBLEM STATEMENT

Digital Marketing Problem

- Patients receive treatment but lack nutrition guidance
- Hospital food is generic and not personalised

Digital Opportunity

- Website enables education, personalization, and easy ordering

NutraCare Solution

Our solution

NutraCare delivers a tech-enabled, personalized hospital nutrition ecosystem that integrates doctors, dietitians, kitchens, and patients into one seamless workflow—turning nutrition into a measurable recovery tool.

Learning Team-6

How NutraCare Works (End-to-End Model)

1. Medical Diagnosis Integration

*Patient condition, age, allergies, and treatment plan captured
Diet mapped according to disease-specific clinical guidelines*

2. Dietitian-Led Personalization

*Certified dietitians design custom meal plans
Meals adjusted based on recovery stage & medication*

3. Fresh & Controlled Meal Preparation

*Hygienic, hospital-grade kitchens
Portion-controlled, nutrient-balanced meals*
